

Clinical Professor: Data Analytics/Decision Sciences/Management Science
Information Technology & Decision Sciences Department
College of Business, University of North Texas

Teach undergraduate and graduate Business Analytics (BA) or Decision Sciences (DS) courses. Strong preference for an experienced, senior clinical professor, with five or more years of discipline-specific managerial experience and five or more years of experience teaching graduate courses, who can step right into teaching and advising in our undergraduate and graduate business analytics/decision sciences programs. Also one with experience developing courses, curriculum, and teaching cases, and who is also able to assist students with career guidance and helping us nurture, expand, and improve our relations with industry. Work and/or teaching experience in data management, DA/DS/MS, and/or IS/IT is desirable, as is a candidate who has written published practice- or pedagogically oriented articles or books.
