

PhD position in Business Administration

Concentration: *Operations Management and Operations Research*

ESSEC Business School is currently seeking candidates for its PhD program concentration in *Operations Management and Operations Research*.

Operations Management & Operations Research (OM/OR) is an interdisciplinary concentration of ESSEC Business School PhD Program. It provides students an advanced training in theoretical approaches and research methods for Operations Management and Operations Research. Operations Management focuses on theoretical, empirical and methodological research of managerial decisions in areas such as supply chain management, environmental operations management, quality management, purchasing management, project management, and new product development. Operations Management concerns the application of quantitative methods for the resolution of optimal decision problems related to production planning, transportation and routing, facility location, network design.

Applicants must hold a master's degree and show strong intellectual ability and interest in academic research.
