Academic General Faculty – Data Analytics and Decision Sciences (DADS)
Darden School of Business at the University of Virginia

The Darden School of Business at the University of Virginia invites applications for an Academic General Faculty (AGF, non-tenure track) in DADS, beginning in the fall of 2025. Applicants should generally have a PhD in Decision Sciences, Data Science, Management Science, Operations Research, Statistics, Computer Science, or related areas by the date of appointment.

AGF applicants are expected to bring something distinctive to the School, such as outstanding teaching, high visibility and effectiveness in working with practicing managers and executives, or a particularly noteworthy research niche. Most commonly, AGFs will be on either a Teaching Track or a Practice Track. For the Teaching Track, primary responsibilities would be teaching and developing curricular materials. For the Practice Track, primary responsibilities would be teaching in both MBA and Executive Education programs and writing with a view to influencing practice. AGF applicants typically bring a distinctive competency to the School without necessarily being expected to engage in the breadth of contribution of a tenured or tenure-track faculty.

The DADS area at Darden specializes in influential academic and practitioner-oriented research, and teaching excellence. There is broad latitude with respect to specific area of research interest. The area offers a variety of required and elective courses to residential and executive MBA students, including a concentration in Data Analytics. Topics currently taught include decision analysis, data analysis, optimization, data science in business, behavioral decision making, game theory and project management. The area also helps staff a Master of Science in Business Analytics program. DADS faculty also teach actively in Darden's non-degree Executive Education programs.

Darden is an organization with a strong culture that reflects a commitment to our mission and values. Candidates who are invited for personal interviews will be asked to describe how they could help foster a learning environment that inspires and engages a diverse audience. (Please read the Darden and University of Virginia statements and resources related to diversity and inclusion).

The Darden School of Business is a top-rated global business school. The University of Virginia is regarded as one of the nation's finest public universities. Charlottesville is consistently ranked among the best places to live in the United States.

To Apply:

Please visit Interfolio, search for "General Faculty, Data Analytics and Decision Sciences." Complete the application and see below for documents to attach. Please note that multiple documents can be uploaded in the CV/Resume box.
