

The future. It's on you. You & Golden Aluminum. We are a continuous casting aluminum rolling mill who established operations in 1984 and is located in Fort Lupton Colorado, 35 miles north of downtown Denver. We are the proud owner of a patented casting process that supplies coiled aluminum sheet to the packaging and automotive markets with a broad range of alloys, thicknesses, and coatings. We care about our environment, our people, and our community because we can't do it alone. We require your exceptional skills to be responsible for the vision and longevity of our complex foundry and mill equipment in an industrial manufacturing environment.

Benefits:

- Profit sharing plan
- 401k Plan
- Healthcare and insurance coverage with generous company contribution
- Training and Development opportunities
- Tuition and gym membership reimbursement
- And much more!

Compensation: \$80,000 – \$120,000 (Dependent on Qualifications)

Job Summary:

We are seeking a Production Superintendent who, operating under general supervision, is directly responsible for organizing and leading the around-the-clock production activity of assigned areas. The position is responsible for day to day direction of approx. 12-24 hourly non-exempt (hourly) employees.

- Manage safety and health programs in the department to assure a safe and healthy working environment in compliance with the federal, state and local regulations. This includes general housekeeping of responsible areas.
- Foster innovation and initiates enhancements to the process to benefit and increase productivity and quality of product.
- Controls waste of materials as well as other direct and indirect costs.
- Leads and directs activities of department personnel
- Clarify and coordinate tasks while providing individual coaching and support needed to keep team members satisfied and committed to achievement of defined goals.
- Conduct all supervisory responsibilities concerning hiring, training, counseling, and assigning work for all assigned employees either directly or through others.
- Develop and maintain open communication within your department as well with other departments.

- Coordinate and work closely with maintenance and engineering to insure prompt and proper diagnosis of equipment failures and minimize operations downtime.
- Work with personnel from support departments, coordinate repairs and periodic maintenance of production equipment, tooling, material handling, and other ancillary equipment as required.
- Responsible for continuous improvement programs to address optimization of equipment and personnel resources, such as kaizen's, standard work and problem solving. Heavy emphasis will be placed on data collection, lean manufacturing principles, capability studies, root cause analysis and benchmarking.
- Work closely with Quality Assurance to meet or exceed all quality standards while compiling with ISO 9001 requirements and promote continued certification.

- 3+ years of supervisory experience in a manufacturing environment
- Previous experience in the metal industry preferred
- Strong knowledge of manufacturing tools and equipment
- Experience in a continuous improvement environment with Greenbelt certification preferred.
- Excellent organization, communication, leadership and interpersonal skills
- Excellent problem solving skills and a strong work ethic

Because Golden Aluminum thrives on the power of diversity and is committed to an inclusive environment where every individual can thrive through a sense of belonging, respect, and contribution, we are committed to giving every qualified applicant and employee an equal opportunity.
